

Contents

Introduction ----->	v
Chapter 1 -----> Issues and ethics ----->	x
Thinking about	x
1.1 Issues	3
1.2 Ethics	6
1.3 Resolving issues	7
1.4 Case studies	9
Chapter review	14
Chapter 2 -----> Understanding atoms ----->	16
Thinking about	16
2.1 Atomic models	19
2.2 So, what's in an atom?	27
2.3 Setting the table	32
2.4 Exploring the periodic table	38
Chapter review	48
Chapter 3 -----> Structure and properties of matter	50
Thinking about	50
3.1 Materials by design	53
3.2 Ions and ionic substances	55
3.3 Molecules and molecular substances	63
3.4 Metals	73
3.5 Comparing matter	76
Chapter review	80
Chapter 4 -----> Light effects ----->	82
Thinking about	82
4.1 Changing direction	85
4.2 Focusing on lenses	93
4.3 Colour my world!	103
4.4 Using light	111
Chapter review	116
Chapter 5 -----> Communication ----->	118
Thinking about	118
5.1 Sending a message	121
5.2 From wires to waves	127
5.3 Satellite technology	136
5.4 Say it with light	143
Chapter review	150
Chapter 6 -----> The Earth's moving crust ----->	152
Thinking about	152
6.1 Continental drift and plate tectonics	155
6.2 Folds and faults	165
6.3 Earthquakes	169
6.4 Volcanoes	175
6.5 Resources from the Earth's crust	
Chapter review	

Chapter 7	-----> Under control ----->	188
	Thinking about	188
7.1	Nerves and reflex actions	191
7.2	Senses—the key to our world	197
7.3	The brain—our control centre	204
7.4	Chemical messengers in animals	213
7.5	Chemical messengers in plants	215
	Chapter review	220
Chapter 8	-----> Balancing environmental systems ----->	222
	Thinking about	222
8.1	Photosynthesis and respiration	225
8.2	Greenhouse gases and global warming	233
8.3	Energy flow through ecosystems	240
8.4	Caring for our ecosystems	248
	Chapter review	258
Chapter 9	-----> Forensic files ----->	260
	Thinking about	260
9.1	Observation and the microscope	263
9.2	Prints and casts	266
9.3	Hair, blood and DNA	276
9.4	Chromatography, UV light, soils and other traces	284
	Chapter review	290
Chapter 10	-----> The ocean planet ----->	292
	Thinking about	292
10.1	Life in the ocean	295
10.2	Mapping the ocean floor	304
10.3	The dynamic ocean	309
10.4	The rich and fragile ocean	314
	Chapter review	320
Chapter 11	-----> Skills link ----->	322
Index	----->	339

About the authors

Jacinta Devlin has taught general science, mathematics and VCE Physics over her 10 years at Kilbreda College, Mentone. She co-authored the first edition of *Heinemann Science Links 1* and 2, and was a contributing author to *Heinemann Physics 12* 2nd edition.

Helen Cochrane is a general science, mathematics, biology and information technology teacher with over 20 years of experience. She now works as a science writer and consultant, with a special interest in research into human learning.

Gary Simpson is currently Coordinator of Independent Learning and Homestead Coordinator at the Woodleigh School. He has taught biology, science and mathematics for 18 years.

Rhonda Coffey has taught science for 25 years in the Geelong region. She has always been keen to introduce ICT and investigative practices into the science curriculum, working in the three areas of science, ICT and library in schools. She has been a Science in Schools Professional Development Leader and currently works as a science writer.

Contributing authors

David Aumann, Naomi Coghlan, Trish Kirley, Katrina Markwick, L.E. Ohman, Karen Romari, Regan Spence, Yvonne Sanders, Lyn Tounson.

Expert teacher review panel

John Roberts (VELS consultant), Brett Barber, Shameem Hashmi, Greg Harg, Phil Lachman, Paul Naughtin, Liz Pizarro, Robert Russell, Victoria Stats, Donr
